This Woman Is Interested In How You Vote On the Rate-Reduction Franchise

The above cartoon is reproduced by permission if it is permitted to maintain its financial credit and from last Sunday's Bee. It was labeled "Early Closing-Why Not Include Mother?"

The woman in the picture seems to be rather busy-and hot.

You will notice that she is using an old-fashioned wood range, which throws a large proportion of its heat into her face and into the kitchen.

If you inquired whether she preferred a much cooler and easier handled gas range, her reply would be something like this:

'Certainly, if I could get gas."

More than 20,000 women in Omaha enjoy the comfort of gas in their kitchens, but there are some in isolated, thinly settled, outlying districts who do

During the next five years the sparsely settled outlying districts will grow in size, in population and in overworked housewives. THEY SHOULD BE SERVED WITH GAS.

If we are to reach them and serve the entire city adequately, our engineers say we must spend more than \$1,000,000 for enlargements and extensions within that period-this in addition to the splendid gas property now rendering high class service.

Approval of the rate reduction franchise at the special election August 19th, will enable us to raise the money

It will also reduce the rates immediately 15 cents, with future rates to be regulated by the city
